## Vineyard Review

These grapes were sourced from the Matawhero Vineyard in the Riverpoint appellation, the first vineyard in New Zealand to plant Gewürztraminer. The clone planted are Entav 47 and the silt loams over clay soils provide ideal growing conditions for Gewürztraminer. Vertical shoot positioned vines were bunch thinned and leaf plucked to ensure an open canopy and a balanced crop load. This ensured full ripeness and intense flavours.

## Winemaking

Picked by machine in the early morning the grapes are transported to the winery without preservative as the berries are small with this variety are small and a little phenolic, Again the decision to pick was left to the winemaker. The juice on arrival is floated and fermented with M2 an aromatic yeast. As per usual the wine stopped fermentation at about 7 g/L of residual sugar and was racked and sulphured, stabilised then filtered and bottled.
